EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

in the Amendment to the Specification, in line 2, insert after "1999" --, now US Patent No. 6,645,199. - -

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

none of the prior art of record discloses or suggests a method of forming a lesion comprising in part the combination of the following steps:

positioning a first probe including a first probe body defining a proximal portion and a distal portion, a loop structure associated with the distal portion, and at least one operative element associated with the loop structure such that the loop structure is at least adjacent the tissue;

positioning a second probe including a second probe body defining a proximal portion and a distal portion and an expandable push structure associated with the distal portion such that the expandable push structure is adjacent the loop structure; and

urging the loop structure in the direction of the tissue with the expandable push structure.

Numerous references disclose the method utilizing the first probe, but none disclose the second probe which is expandable and used to push the first probe into position adjacent tissue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
